

# HEPATITIS C INTERVENTION IMPLEMENTATION SYMPOSIUM

Join us for a Symposium on the practical aspects of implementing evidence-based interventions for hepatitis C virus (HCV), including point-of-care testing, reflex testing, peer support, patient navigation and case finding.

This symposium will showcase good practice interventions and models of care, highlighting key research, challenges and learnings in a collaborative environment, with the aim of supporting participants to develop or enhance their own HCV models of care.

It is intended for anyone working with people who use drugs, interested in implementing or scaling up interventions for HCV in their service setting, including doctors, nurses, frontline workers, peer workers, pharmacists, and policymakers from a variety of settings.

By the end of this symposia, you will be able to:

1. Identify areas for enhancement or scale up in your own HCV service delivery
2. Understand how a variety of interventions work
3. Identify suitable interventions to enhance HCV service delivery
4. Describe how interventions can be implemented in your service setting
5. Analyze possible barriers to implementing interventions and how to overcome them

There are three elements:

1. The practical sessions in the symposia draw from our [HCV Intervention Toolkit](#)
2. The symposia will bring these interventions to life, providing the practical skills and knowledge needed to implement or scale up interventions in your service
3. Post-training, participants will have access to ongoing follow-up webinars to support troubleshooting

With thanks to our collaborators:

**Date:** Thursday October 26 2023

**Time:** 9:30am-3:00pm

**Location:** [CUNY Graduate Centre, 365 5th Ave, New York, NY 10016](#)

**Cost:** Attendance is free, but places are limited and granted on a first-come, first-served basis. Registration is essential.

**More information:** For further details please contact [Olivia.Dawson@inhsu.org](mailto:Olivia.Dawson@inhsu.org)
